Lemoine's New Hardy Hybrid Gladiolus.

The odd and fantastic markings of these Gladiolus, and their beautiful shape, resemble the fascinating beauty of that rarest of all flowers, the Orchid. Yellow, crimson, white, brown, green, pink, etc., are blended together, producing an effect seen in no other flower. They are of recent introduction, therefore new and quite unknown. It is useless to attempt to describe their real beauty, for it cannot be done. They must be seen. Besides their gay colors and odd markings, they have two very important points of superiority over other sorts. First, they bloom two or three weeks earlier, and are in full perfection before others appear. And, secondly, they are hardy, and may be left in the ground over winter, from year to year, without lifting in autumn; yet we do not advise this plan, as we think it better to lift them in the fall and store them in the cellar, that they may be planted out in fresh mellow soil in spring. They do well either way.

Gladiolus Dracocephalus.

An odd and curious species of Gladiolus which should be found in every collection. It is unlike all other sorts in color, being a peculiar and indescribable mixture of bronze, green, and red. We have a large stock and can offer it at the very low price of \$1.00 per 100.

Gladiolus Seed.

We can supply Gladiolus seed of our choicest strains as follows:

- Candevensis Hybrids**—From best named flower, \$1.00 per oz.; \$10.00 per lb.
- Lemoinii Hybrids**—From best named flower, \$1.00 per oz.; \$10.00 per lb.
- Childsi, Extra Select**—\$3.00 per oz.

Gladiolus Childsi.

This is the most important and valuable floral introduction which this generation has seen, and one which will completely revolutionize and bring into still greater importance the Gladiolus. It is a class of hybrids raised by Max Leichtlin, owned and cultivated some years by the Mayor of Argenteuil, France, and later by Messrs. Hallock & Son, where they have been seen and so greatly admired for many years.

DESCRIPTION.—They are much stronger and more vigorous than other Gladiolus, the growth being exceedingly rank, and the foliage dark, healthy green. They are very tall and erect, often standing four or five feet high, with spikes of bloom over two feet in length. They branch freely in most cases, each stem producing three or four spikes of bloom. The flowers are of great substance, and of gigantic size, frequently seven to nine inches across. The form of both the flower and spike is perfection itself, and they last a long time in bloom before fading, owing to their great substance and vigor; but the most striking feature is their coloring. Orchids cannot surpass them in varied and delicate shades, marking and blendings. Every color known among Gladiolus is represented, and many never before seen, particularly blues, smoky-greys and purple-blacks, all having beautifully mottled and spotted throats made up of white, crimson, pink, yellow, etc., and in this peculiar network of charming spots and colors lies one of its special points of unsurpassed beauty. The flowers are much more beautifully colored than Lemoine's Hybrids, and much larger than any Gandewans. Even the beautiful flowers of the weak-growing Nanceianus cannot compare with the regal beauty, size and coloring of this class.

Named Sorts of 1893.

PRICE, \$20.00 PER HUNDRED.
